

Flav-R-Savor® Holding and Display Cabinets

Models: FSD-1, -1X, -2, -2X
FSDT-1, -1X, -2, -2X

The Hatco Flav-R-Savor® offers a unique concept in food holding and display. Balancing a precise combination of heat and humidity, Flav-R-Savor Cabinets increase sales and profits by reducing waste, maintaining quality and displaying food with appealing design. Utilized in cafeterias, convenience stores, schools, restaurants and supermarkets, Flav-R-Savor Cabinets are a perfect way to merchandise your hot food items such as pizza, fried foods, bakery and more.

Our quick recovery heating system and extremely even temperatures throughout the cabinet eliminate “hot spots” and ensure consistent product quality and long hold times (1 to 4 hours)..

Standard features

- Fluorescent lights help showcase food product
- Tempered glass door and side panels provide maximum heat retention and allow for full cabinet display
- ¾ gallon (3-liters) stainless water reservoir provides all day moisture, is easily filled through the front mounted water cup and easily drained and cleaned through the inside mounted drain tube
- Low-water protection prevents heating element burnout and alerts operator to low water condition
- 120-volt operation with attached 15-amp cord set operates on a standard outlet, and draws a maximum of 12 amps
- Large access doors are field reversible and will accept a 19" (483 mm) diameter pizza pan

WATER QUALITY REQUIREMENTS

Incoming water in excess of 3.0 grains of hardness per gallon (GPG) (.75 grains of hardness per liter) must be treated and softened before being supplied to booster heater(s). Water containing over 3.0 GPG (.75 GPL) will decrease the efficiency and reduce the operating life of the unit.

Note: Product failure caused by liming or sediment buildup is not covered under warranty.
